

Apex Learning

CodeBru was hired to redesign and develop the corporate marketing site for Apex Learning – a digital curriculum provider based in Seattle. The site includes a responsive design, CMS, back-end database, custom graphics, and a newsroom page with a blog.

Mobile-friendly, responsive design that adapts to all devices

"We really enjoy using Tutorials."

"Several of our teachers are using Tutorials to offer differentiated remediation and to supplement their instruction, and school-wide we are using them to provide targeted interventions for specific students. We really enjoy using Tutorials."

Kashia Sells, Technology Specialist
Mount Vernon Sr. High School, IN
